

ERMA FIRST

ERMA FIRST FIT BWTS

THE ESSENTIAL CHOICE FOR NEWBUILDS

ERMA FIRST FIT BWTS is an advanced modular system developed to exceed all special installation requirements for newbuild vessels. The system's unique design enables straight-forward installation for projects with a reduced number of components, cables and pipes.

- Ease of installation, reduced installation costs, minimum system footprint
- Single mode of operation, covering all seawater qualities and conditions
- Highly experienced project management and design team
- Optimized power efficiency, lowest OPEX
- Largest on-site commissioning and supervision teams
- The only AI integrated BWTS on the market
